

Ankita Shendge

Sunnyvale, USA | ankitashendge15@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Education

Master of Science, Information Technology | University of Denver | Aug 2024 | GPA: 4.0/4.0

Bachelor of Engineering, Computer Engineering | Pune University | May 2014 | 75%

Professional Summary

- Developed scalable web applications using React.js, Vue.js, TypeScript, and modern JavaScript.
- Built responsive, accessible, mobile-first UIs with HTML5, CSS3, Tailwind CSS, and Bootstrap.
- Implemented state management using Redux and Context API for scalable application architecture.
- Integrated RESTful APIs and optimized data fetching using Axios and Fetch API.
- Improved performance through lazy loading, code splitting, and bundle optimization.
- Implemented secure authentication and authorization using JWT, OAuth 2.0, and RBAC.
- Built reusable component libraries and design systems using Storybook and Figma.
- Developed automated tests using Jest, Cypress, and React Testing Library.
- Collaborated in Agile teams using CI/CD pipelines, code reviews, and feature-flag-based development.
- Leveraged AI tools including GitHub Copilot, ChatGPT, and Codex to accelerate development and improve code quality.

Technical Skills

Frontend: React.js, Angular, Vue.js, Next.js, TypeScript, JavaScript (ES6+), React Hooks, React Router, HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, Redux, Context API, Responsive Design, Cross-Browser Compatibility, Accessibility (WCAG)

Design & Prototyping: Figma, Storybook

Backend & APIs: Node.js, Express.js, RESTful APIs, JSON, Axios, Fetch API, OAuth 2.0, JWT Authentication

Databases: PostgreSQL, SQL, Prisma ORM

AI & Developer Tools: ChatGPT, GitHub Copilot, Cursor AI, Claude AI, Gemini AI

Deployment & Hosting: Vercel, Netlify, Firebase Hosting, GitHub Pages

Build & Tooling: Vite, Webpack, npm, Yarn, Git, GitHub, CI/CD, Postman, Jira

Testing & Performance: Jest, React Testing Library, Cypress, WebPageTest, AppDynamics

Work History

Frontend Engineer | Audemy.org | Feb 2025 – Present

- Developed the [Accessibility Studio](#) and analytics dashboards to improve accessibility management and provide insights into student progress and game performance.
- Built responsive Vue.js components and integrated REST APIs to support student and educator workflows.
- Improved accessibility compliance by implementing WCAG standards across platform features.
- Optimized application performance through code splitting, lazy loading, and component-level enhancements.

Web Developer Intern | Seven Mentors | Jun 2024 – Aug 2024

- Developed responsive React.js components from Figma designs for a restaurant web application.
- Built reusable UI components and integrated dynamic content using Redux and Context API.
- Improved application performance, accessibility, and cross-device compatibility.
- Participated in code reviews, testing, and Agile sprint ceremonies.

Teaching Assistant, IT 4505 | University of Denver | Jan 2024 – Mar 2024

- Helped professor in constructing Frontend project problem statements
- Held weekly office hours to support a class of 20 students with frontend development concepts and project guidance.

Software Engineer | Tata Consultancy Services | Aug 2018 – Mar 2021

- Developed SQL queries and reporting solutions to support data extraction, aggregation, and business intelligence within banking systems.
- Monitored and improved page load times using AppDynamics, enhancing transaction performance
- Resolved L2/L3 issues for 30+ HCL Notes applications, ensuring SLA adherence, workflow optimization
- Designed internal portals for transaction cost metrics leveraging React.js, HTML, and CSS for responsiveness
- Improved application reliability through Postman-based API testing (50+ test cases across 20 APIs) and log analysis.
- Handled 24/7 on-call incident management as escalation point, minimizing downtime for critical systems

Projects

Gericht Restaurant Website | React, Redux, Context API [Link](#) –

- Developed responsive React.js application using Redux and Context API.
- Built reusable UI components including dynamic menus, newsletter subscriptions, and interactive carousels.
- Enhanced accessibility, responsiveness, and cross-device compatibility.

E-Commerce Application | Flutter, Dart-

- Developed a cross-platform eCommerce application using Flutter and Dart for iOS, Android, and web.
- Implemented full-stack features including authentication, product catalog, personalized profiles, checkout, and order history with secure, cross-browser server-side integration.

Spotify Music Application | React, Spotify API, OAuth 2.0 [Link](#)-

- Built Spotify-powered React application integrating Spotify Web API and OAuth 2.0 authentication.
- Implemented real-time search, playback controls, playlists, and personalized music discovery.
- Improved application performance through Context API state management and optimized API requests.
